Mr. Mon. E. Baggs, President  
Student Writing Projects R Us  
159 Edgewood Drive  
Richland, WA 99352

Dear Mr. Baggs:

Subject: Term Project Submission

I am pleased to submit this term project detailing the feasibility of a wide scale adoption of advanced irrigation technology for home use. The report, in its entirety, is attached to this letter.

The purpose of the term project was to address the rising fear of a global water shortage with smarter irrigation of private landscaping. This document was contracted 07/23/2004 for Mr. B.M. Upscotty, as well as local policymakers who could help implement a strategy of intelligent water management as a community initiative.

An interesting note is the evolution of the technology, as it shows rapid progress in the area of irrigation.

The proposed layout of the document was changed in the final revision by changing the Conclusions section to Analysis and the Recommendation section to Conclusions. This is because the evaluated criteria begged to be analyzed, since it strayed so far from the authors expected results.

This study would not have been possible had it not been the support of Mr. Steven Ralph and my Mum. A followup report should be undertaken within the next five years to asses the changes in the irrigation market.

Thank you very much for the time invested in this report. Please look kindly upon the material. I can be reached by email at [tyson@wsu.edu](mailto:tyson@wsu.edu).

Sincerely,

Tyson A. Tucker  
Researcher and Writer
